Student:

I realize that:

The minimum enrollment required for work-study is 12 credit hours

I realize that if I drop my enrollment to less than 12 credit hours or stop attending class less than half-time in a semester, I am not eligible to continue working for that semester.

That a background check must be completed and approved by Human Resources before I can start working

I may not work over the stated hours per semester

I may not begin working until I have an award posted by the Financial Aid Office
