for complete information

**POTENTIAL INSTRUCTORS:** Do you have knowledge or special skills you would like to share with others? Have a great idea for a class you'd like to teach? Consider teaching a short-term community education class. We are always looking to add to our course offerings for everyone from hobbyists to history buffs and beyond.

**EMPLOYERS:** Please help us to help you by letting us know what type of training your employees need in order for your business to be more successful. In some cases, you may qualify for a grant to help pay for 60% of the training.

*We are also compiling a list of qualified instructors to help us respond to the training needs of employers in a timely manner. If you are able to teach workplace safety, equipment operation, soft skills, etc. and would be willing to teach on an as-needed basis, please let us know.*

**MAKERSPACE:** Opportunities exist to serve your community through paid instruction for workshops or volunteering to share your knowledge or time in the Collaboratory makerspace.

CONTINUOUS IMPROVEMENT IS  
BETTER THAN DELAYED  
PERFECTION.....  
~MARK TWAIN~

Never Stop Learning!

## Entry-Level Driver Training ELDT for Class A (online)

This Class A CDL training course is designed to meet all theory (knowledge) requirements listed in The Code of Federal Regulations (CFR) 49 CFR Part 380, Special Training Requirements. It includes sections covering basic operation, safe operating procedures, advanced operating practices, vehicle systems and reporting malfunctions, and non-driving activities—all essential to obtaining your Class A driver's license. This CDL course was created in collaboration with an approved training provider listed on FMCSA's Training Provider Registry (TPR).

Upon successful course completion, you will be further prepared as you work to obtain your Class A CDL by meeting the FMCSA training standards, and your completion record will be uploaded to the U.S. Department of Transportation's (DOT) TPR. Once you meet other federal training requirements, such as behind-the-wheel training, you can take your state CDL test. Once you successfully take the CDL test, you will be issued a state CDL and may be eligible to be hired by companies that operate Class A trucks in commerce. Complete information is available at [careertraining.ed2go.com/tsjc/construction-and-trades/programs/](http://careertraining.ed2go.com/tsjc/construction-and-trades/programs/)

**Class B, Class B-A and Hazardous Materials are also available**

## Beginning Table Loom Weaving

Not only is weaving one of the oldest surviving crafts in the world and one of the primary methods of textile production, but research is showing that fiber arts can help teach STEM concepts such as math.

Article: UMASS Lowell Textiles Help Teach STEM  
[www.uml.edu/news/stories/2016/lowelltex.aspx](http://www.uml.edu/news/stories/2016/lowelltex.aspx)

Join us for Beginning Table Loom Weaving  
February 21, 23, 28 and March 2nd from 6-8 p.m. in Berg 401

Tuition and Materials \$95

You will become familiar with the workings of a loom. A touch of social and historic context will precede a hands-on opportunity to design a small project, warp it, dress the loom with it, and begin weaving. Each student should be able to complete the project during the course and leave with a project or two (a belt) and the confidence and knowledge to move on to larger projects. The course will consist of 4 two-hour sessions with the option to add additional hours to work on a larger project after the original course has ended. Course is limited to three students.

*Instructor: Sabine MacWaters. After over twenty years working and learning with a professional weaver, Greentree Weaving, Sabine has begun to work on her own textile art via Sabine's Home and Hearth (@sabineshomeandhearth). Her enthusiasm, experience, and love of textile crafts make teaching a great use of Sabine's skills.*
