TRINIDAD STATE COLLEGE

TECHNICAL THEATRE

Trinidad State's program in Technical Theatre provides students an opportunity to learn about the systems that make theatres work, and how to make every event a great experience for audiences & performers. Across courses in stage design and management, lighting, sound reproduction, costuming, and more, students gain skills that prepare them either for continued study, or immediate careers that support the entertainment industry.

In conjunction with TSC's Theatre Department, students in Technical Theatre help facilitate multiple theatrical productions each year, making use of the state-of-the-art light, sound, and staging systems located in the Massari Center for the Performing Arts, on the Trinidad campus. Massari is newly renovated and provides students the opportunity to learn the latest in theatre technology.
